

Adam Jablonowski

I am interested in serving on the governance committee as a representative of a physician association with over 4,000 members in the greater Detroit area. I believe the future of the HIE hinges on our success in obtaining the commitment of physician to fully participate in the process that we will have underway in the very near future. My background of over 30 years in health care includes both professional and volunteer experiences that form the basis for my confidence in my ability to bring our GC to its formalization as a legal entity.

*State and county medical society executive for over 17 years
